Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-45 and 78, drawn to a device, classified in class 436, subclass 514, for example.
- II. Claims 46-61, drawn to a kit comprising a homogenizing buffer, classified in class 436, subclass 63, for example.
- III. Claims 62-77, drawn to a kit comprising an extracting buffer, classified in class 436, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation since the test kits require either an homogenizing or extracting steps that are not required for use of the test device of Group I. Inventions II and III are unrelated. 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group I is not required for Group II-III, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
